1.0 INTRODUCTION

Throughout the existence of the Crowe Valley Conservation Authority (CVCA), the Authority has been actively involved in water management and in particular, flood forecasting and warning. The Authority utilizes 13 stream and lake level gauges to monitor real time conditions in the watershed. As well, information related to flood forecasting is received from the Ministry of Natural Resources in Peterborough, Ontario. The Authority also monitors precipitation, snow pack and advancing weather conditions.

Following severe flooding in 1976, an engineered flood study was undertaken and many areas that are susceptible to flood damage were identified.

The Authority is responsible for advanced warning and monitoring of flood situations; the individual municipalities are responsible for reacting to flood emergencies.

2.0 OBJECTIVES OF CVCA FLOOD WARNING SYSTEM

- To provide communication to local municipalities, the public and emergency response services regarding potential flooding, and to provide rapid warning if loss of life, injury or property damage may result.
- To provide continuous monitoring of flood conditions should a flood occur.

3.0 MANDATE OF THE CVCA

In the publication, "Planning for Flood Emergencies" prepared by the Ministry of Natural Resources, it states that:

"It will be a function of Conservation Authorities to maintain a flood warning system throughout the Authority for alerting municipal representatives, media, local police, the Ontario Provincial Police, and the Ministry of Natural Resources"

4.0 PROCEDURES

The CVCA, on a daily basis, obtains water levels, flow rates and precipitation data from gauges throughout the watershed of the Crowe River system. In normal water conditions, these gauges are contacted a minimum of once per day, seven days a week. During flooding conditions, the gauges provide real time water levels and flow data as required.

The Water Resource Technician will:

- (1) Collect all the water levels, flow volumes, precipitation and temperatures throughout the watershed.
- (2) Contact the Ministry of Natural Resources for Provincial weather conditions which may impact the CVCA watershed.
- (3) Review and additional information that is necessary from the Provincial Surface Water Monitoring Centre, CVCA weather monitoring stations and/or any other local sources.
- (4) The Water Resource Technician will make a decision whether there is a need for stop log changes, and/or the issuance of a flood watch or flood warning statement.
- (4) The Water Resource Technician will immediately advise the General Manager.
- (5) The General Manager will prepare the necessary statements.
- (6) The communications staff will post on the website, send it to municipalities and agencies listed in the Flood/Emergency Contact List and post on CVCA social media account (FaceBook).

Monthly Water Level Reports

For reference purposes, daily records are summarized into a "Monthly Water Level Report" which is available at the CVCA office during regular seasonal flows. This report indicates regulated winter and summer lake levels, minimum and maximum levels as well as the level on the last day of each month for each controlled lake and gauge site in the Crowe River Watershed.

5.0 Flood Warning Telephone List

5.1 Crowe Valley Conservation Authority

Janette Loveys Smith, Office: 613-472-3137
General Manager/Secretary Treasurer Cell: 705-872-8048
Email: janette.smith@crowevalley.com

Emergency Only - Cellular Phone: 613-848-2478
(This cell number will contact one of the CVCA staff 24 hours a day 7 days a week during a flood warning)

Round Lake	199.34m	200.10m	200.01 M	199.91 M	199.92 M
Wollaston Lake	309.88m	310.30m	310.07 M	310.00 M	310.00 M
Allan Mills	NO LONGER IN SERVICE				
Oak Lake (previous month)	0.10m	0.50m	0.34m	0.33m	0.34m
Conversions: ✓ Metres to feet: multiply by 3.2808 ✓ Cubic metres/second (cms) to cubic feet/second: multiply by 35.315 ✓ Millimetres (mm) to inches: multiply by 0.039		Total amount of precipitation recorded this month: Belmont Lake: 28.7 mm = 1.1 inches (rain) Glen Alda: 75.8 mm = 3.0 inches		Total number of dam operations undertaken during month: 25	
Monthly Summary: Watershed conditions have improved across the entire CVCA watershed and are now considered to be normal for this time of the year. Flows will be increasing during January as more dam operations will be performed.					
For further information, please contact Crowe Valley Conservation Authority P.O. Box 416, Marmora, Ontario K0K 2M0 Phone (613) 472-3137 Fax (613) 472-5516 E-Mail: info@crowevalley.com					

APPENDIX 4 - SAND BAGS

In a flooding emergency situation, the Crowe Valley Conservation Authority will act in an ***advisory manner only***.

Therefore, the CVCA only maintains a small supply of sand bags which, in emergency situations, may be made available to watershed municipalities and/or residents, on an "as needed" basis as a stop gap measure in an emergency situation.

The CVCA does not have sand stockpiled for sandbagging purposes. Sand should be readily available from each municipality.

Municipalities are encouraged to maintain an adequate supply of sandbags on hand at all times and be prepared to supply sand also on an "as needed" basis.

Sand Bag Supplier

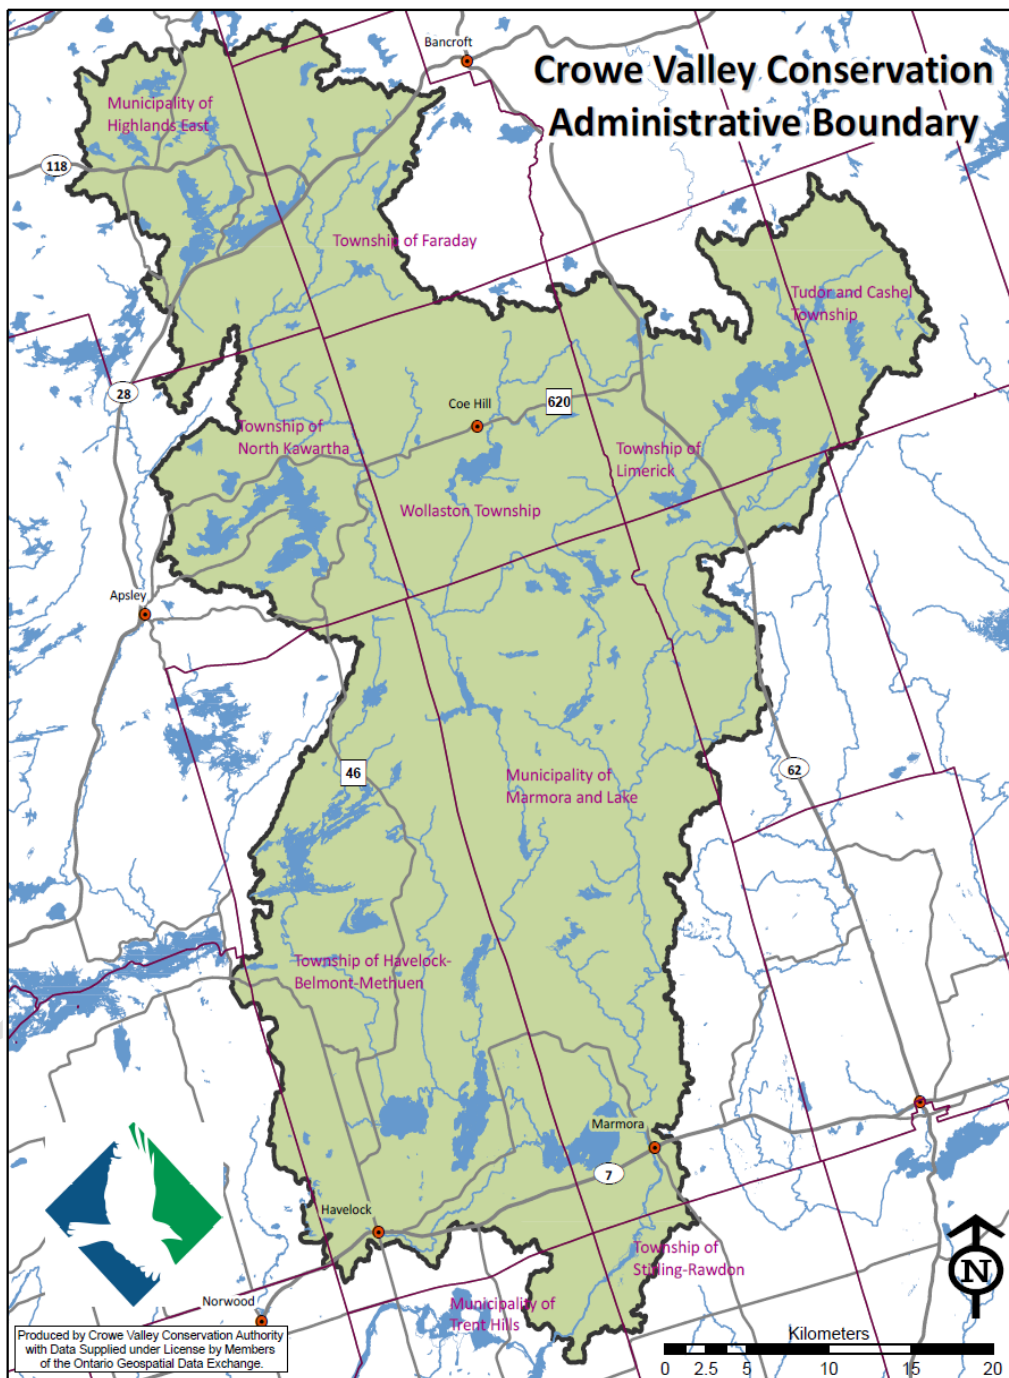

Sand bags may be purchased from the following supplier:

Burtex Industries
Invoice Farrell Enterprises Limited
66 Bartor Road
Weston, Ontario
M9M 2G5
Telephone: 416-745-2711
After Hours call Jeff Herskowicz
Toll Free: 800-268-0908
Email: orders@farrellpack.com
